

National governing bodies of sport funding

The funding each governing body has been awarded in the February 2017 decision round is below. More funding decisions, including participation and talent investments decisions for the sports below and decisions on other sports not listed, will be made in March 2017.

Governing bodies connect most naturally to sport's core market of regulars and therefore most of the funding announced today will be targeted there. There will be opportunities for governing bodies to bid for other open funding rounds targeting other types of customers, such as those who are less active, in the next four years.

| National Governing Body | Participation* | Talent | National teams | 2017/21 award |
|-------------------------|----------------|------------|----------------|---------------------|
| Tennis | £5,193,292 | £3,000,000 | | £8,193,292 |
